## GYRO

The Gyro lighting collection is inspired by nineteenth century experimental physicist Leon Foucault's gyroscope: a device used for measuring orientation. Extracting key elements from the historical instrument such as its multiple axes, the gyroscope has been reinterpreted into a framework of aged metal spheres fixed around a nucleus of candle lights. These sculptural forms have been redesigned into functional lighting fixtures including floor lamps, sconces, table lamps, and pendants, and are featured in two authentic finishes: Antique Rust and Natural raw metal.
